- Safe and reliable
- Saves money on heavy lock out kits
- Fits any 3 pin 13 Amp 240v BS 1363 UK plug
- Screw thread secures device on earth pin
- Small and lightweight
- Combination setting instructions included

Description

The Socket & See PLUG LOCK has been designed to provide an easy and affordable way to lock off any 3 pin 13 Amp 240v BS 1363 UK plug.

Featuring a 3 digit combination that can be set by the user when first being used, each device is then made unique. There are also no keys to lose. The code can be reset if required.

To lock off a plug, simply place the PLUG LOCK over the three pins and carefully turn the screw until it is securely making contact with the earth pin. Gently pull the plug to make sure the device is securely attached. Close the locking pin and scramble the lock.

Two 'DO NOT OPERATE' tags are included which can be hung from the shackle. Each notice includes space for the date, engineers name, contact telephone number and signature.
