

## DLM-PRO LEAD 3 Wire Non-Fused Test Lead Set

- Combines red/brown and black/blue cables as a reminder of old/new colour codes.
- Dual-insulated and wear-indicating
- Earth piggy back facility converts 3-wire set into 2-wire set
- For use with single and multi function testers
- High quality, multi-stranded flexible conductor
- Streamlines electrical testing tasks and saves time
- Shrouded 4mm connectors
- Robust insulated croc clips
- GS38-compliant probes

### Description

The DLM PRO LEAD is a versatile tool designed to streamline your electrical testing tasks. This lead set combines the traditional red/brown and black/blue cables, serving as a helpful reminder of both old and new harmonized colour codes.

With its dual-insulated construction and wear-indicating lead, the DLM PRO LEAD ensures optimal longevity. The inclusion of robust crocodile clips and GS38-compliant probes further enhances its reliability. Notably, the probes and crocodile clips are interchangeable, adding convenience to your testing process.

An outstanding feature of this lead set is its earth piggyback facility, enabling two-wire testing as an alternative to conventional three-wire testing methods. This flexibility enhances efficiency and saves valuable time.

Compatible with a wide range of single and multifunction testers, such as digital multimeters, clamp meters, and two-wire loop testers, the DLM PRO LEAD

offers exceptional versatility to suit various testing needs.

Experience the convenience, safety, and adaptability of the Socket & See DLM PRO LEAD—a reliable companion for your electrical testing requirements.
