

SOCKET & SEE™

ITLS400 Fused Test Lead set

- High protection fused lead set
- For use with loop / RCD testers using standard IEC mains input
- New harmonised mains colours of brown and blue
- One click system means the fuse stays in place
- Robust construction for regular use

Description

The Socket & See ITLS400A Fused Test Lead Set is a high protection fused lead set compatible with all loop and RCD testers using a standard IEC mains input socket. The set uses the new harmonised mains colours of brown and blue - the strain relief is in red and black to give a reminder of the changes.

The test lead set uses the new Socket & See one click system which means the fuse does not have to interchange between prod and croc clip - it stays in place at all times.
