

- Facilitates testing with Socket & See MFT5000 in difficult to reach areas
- Integrated test button on probe for easy and efficient testing
- 1.3m long durable silicone test lead for flexibility and convenience
- Allows testing to be performed in hard-to-reach areas, saving time and effort
- CAT IV 600V rated for safety and reliability
- Compact and easy-to-use design
- Reduces the risk of accidental shock by enabling remote testing
- Compatible with other multifunction testers with 4mm jack sockets
- Increases efficiency and accuracy of testing in diverse settings

Description

The Socket & See Remote Probe is a valuable accessory designed specifically to facilitate testing with the Socket & See MFT5000. This remote probe is engineered to make testing faster and more convenient, particularly in difficult-to-reach areas. It is an ideal solution for electricians who need to test circuits in challenging locations or where access to the Socket & See MFT5000 is limited.

This remote probe features an integrated test button, allowing for quick and easy testing at the point of contact. This ensures a reliable and accurate test without any inconvenience.

Moreover, the remote probe comes equipped with a 1.3m long, durable silicone test lead, enabling electricians to reach inaccessible and hard-to-access points effortlessly.

The Socket & See Remote Probe is also CAT IV 600V rated, ensuring its safety and overall compliance. It meets industry voltage and current measurement standards, providing users with peace of mind when using it in the field. With its ergonomic and easy-to-use

design, the Socket & See Remote Probe is an excellent addition to the Socket & See MFT5000, making testing more efficient and convenient than ever before.
